FIRST AID MEASURES

4.1 Description of first aid measures

Following inhalation
- If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical advice/attention if you feel unwell.

Following skin contact
- Remove contaminated clothing and safely dispose of. After contact, wash with soap immediately.

Following eye contact
- In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. If easy to do, remove contact lenses, if worn. Get medical attention immediately.

Following ingestion
- If swallowed, do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Immediately call a POISON CENTER or doctor/physician.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms – Injury after inhalation
- May cause respiratory tract irritation.

Symptoms – Injury after skin contact
- Causes skin irritation.
- May cause burns in the presence of moisture.
- Skin contact during hydration may slowly develop sufficient heat that may cause severe burns possibly resulting in permanent injury.
- Do not allow product to harden around any body part or allow continuous, prolonged contact with skin.
- Handling can cause dry skin.
- May cause sensitization by skin contact.

Symptoms – Injury after eye contact
